

Read and follow these safety instructions first

1. Safety instructions

- 1.1 Installation, mounting (fix into hoses), putting into operation, maintenance, removal and repair may be carried out by qualified experienced specialists with knowledge in pressurized piping construction only.
- 1.2 The statutory and other applicable regulations and standards have to be noticed and kept.
- 1.3 The pressure of maximum 10 bar, temperature of maximum +120 °C, the instructions of the
> **EU-Declaration of conformity EUKE-DG-K100**
and – if a limit switch is mounted – the instructions of the
> **Appliance information KE-GI-... resp. the technical datas of the KE-TD-..**
have to be noticed and kept.
- 1.4 Putting into operation and pressure admission only
- after correct building-in of the hose coupling into the delivery hose
 - after correct mounting of the coupling with thread at the tube (threaded connection) and if need by fixation with the locating screw
 - with closed coupling connection
- !!! Before pressurize the tubing make sure that the couplings are correct inserted resp. connected and
- with Storz-couplings
- is pulled to the limit stop
- with couplings according to DIN 28 450
- the clamping ring is tightened firmly and the safety lever is folded down
- with KAMLOK – couplings
- both levers are turned down to the coupling
- 1.5 **Disconnect resp. open the coupling connection only when pressure-free.**

ATTENTION ! Danger of injuries

- If loosened and opened in pressurized condition the blank coupling, blank cap resp. closing cover or closing plug will accelerate like a bullet and may cause serious injuries and damages.
- If loosened in pressurized condition the hose will lay about one and may cause serious injuries.

- !!! Before loosen resp. open the coupling connection make sure that the tubing is pressure-free.

Depending on over pressure and hose diameter place suitable warning information.

e.g. **“Loosen only in pressure-free condition”**

- 1.6 If one of the coupling elements is damaged the pressurizing has to be shut off immediately and the tubing resp. hose line is to relieve from any pressure.

- 1.7 Elements of the coupling should be removed or demounted only in pressure-free condition.

- ▶ !!! For couplings with build-in limit switch take also notice of the safety instructions on the back.

Read and follow these safety instructions first.

2. Safety instructions for couplings with built-in limit switch

- 2.1 The installation, initial operation and maintenance may be done by a qualified expert with electrical know-how only.
- 2.2 Comply with the electrical connection take notice of the local and statutory rules and regulations and/or the VDE 0100.
- 2.3 Before electrical connection, compare the supply voltage with the details at the data plate.

for the version KE - ...

- 2.4 A fuse (with max. 4 A) has to be connected in series to the voltage supply.
- 2.5 Protect the signal contacts from voltage peaks when inductive loads are connected.

for the version KI - ...

- 2.6 A fuse (with max. 4 A) has to be connected in series to the voltage supply.

Notes

The page contains a large grid area for taking notes. On the left side of the grid, there is a faint, large watermark of the MOLLET logo, which consists of several concentric, curved lines forming a partial circle.

Order code

Type	NG	G	W	KL	Li.	L	GL	A	B	C
KI - VK 080	IG3	AL	3	3	76	47	24.5	45.7	35	25
KI - VK 100	IG4	MS	3	3	95	47	24.5	58.5	35	30

NG = Nominal size
G = Thread
W = Material
KL = Cable length
Li. = Inner diameter

According to Directive 2014/68/EU for pressure equipment:
Usable for hazardous gases and liquids of group 1 up to 10 bar and up to DN 100

For example in pneumatic conveyor systems with combustible dusts etc.

Result of the evaluation of ignition danger acc. to DIN EN ISO 80079-36:
The couplings (without switches) have no potential source of ignition on their own.

Seal ring depending on type and acc. to data sheet KE-GI-11.

Wiring connection

Cable 3 x 0.34 mm²
Cable length (KL) 3 = 3 m
5 = 5 m
0 = 10 m
